

SOCAL MACHINE LEARNING SYMPOSIUM

**FRIDAY, NOV. 18
@CALTECH**

The Southern California Machine Learning Symposium brings together students and faculty to promote machine learning in the Southern California region. The workshop serves as a forum for researchers from a variety of fields working on machine learning to share and discuss their latest findings.

Topics to be covered at the symposium include, but are not limited to:

- + Machine learning with graphs, social networks, and structured data.
- + Active learning, reinforcement learning, crowdsourcing.
- + Learning with images and natural language.
- + Learning with high-dimensional data.
- + Neural networks, deep learning, and graphical models.
- + Learning dynamic and streaming data.
- + Applications to interesting new domains.
- + Addressing each of these issues at scale.

The majority of the workshop will be **focused on student contributions**, in the form of contributed talks and posters.

A **\$500 first-prize** and a **\$250 runner-up prize**, sponsored by Google Research, will be awarded for the best student presentations.

KEY DATES

October 4
Abstract Submission
Deadline

October 14
Notification

November 11
Registration
Deadline

November 18
Symposium
